3.0 LABORATORY STAFF

3.1 LABORATORY TECHNOLOGIST

3.1.1 Intern Biomedical Scientist

Job Title: Intern Biomedical Scientist
Grade: Intern Biomedical Scientist
Responsible To: Chief Medical Laboratory Technologist
Accountable To: Chief Medical Laboratory Technologist/Head of Facility

Job Purpose
To provide medical laboratory (analytical) services and contribute to patient care through good laboratory practice and adherence to quality assurance measures.

Job Summary

Main Duties and Responsibilities

- Carry out routine laboratory tests and assist in provision of special services in clinical, Reference laboratories and diagnostic laboratory areas as may be directed.
- Undertake laboratory technical work within acceptable turnaround times in accordance with departmental standard operating procedures and safety guidelines.
- Document and keep accurate records (log) to maintain good laboratory practice.
- Provide a high standard of technical service as a member of the health care team to assist in efficient delivery of patient care.
- Ensure equipment in their care is maintained to the standards required by the department and by relevant legislation.
- Implement internal Quality Control (QC) measures of technical procedures.
- Assist in research, evaluation of new techniques and laboratory audits.
- Perform any other duties and responsibilities as may be assigned by the head of the Unit.

Management of Financial and Physical Resources

No specific Duties in respect of this.

Management of Human Resources

- Assist in the induction of students in the laboratory.
- Maintain high standards and quality of own work.
- Participate in staff meetings as appropriate.
- Manage own work and assist in the supervision of students in the laboratory.
**General Management Duties**

- Implement departmental operational policies in own work area.
- Assist in the supervision of laboratory assistants and students in the laboratory.
- Assist in the conduct of laboratory audits.
- Assist in the implementation of standards of Customer Care.

**Diagnostic/Technical Duties (Laboratory areas)**

The post holder is required to:

- Learn to undertake the resolution of technical laboratory problems and manage situations, which may otherwise result in a service delivery failure with supervision.
- Assist in the measurement and monitoring of accuracy and precision of laboratory instruments using appropriate quality control procedures.
- Perform manual, semi-automated and fully automated laboratory investigations accurately and safely.
- Assist in the Preparation, examination and reporting of results following examination of specimens as directed.
- Ensure personal duty of care with respect to laboratory equipment.
- Develop skills and participate in regular, routine maintenance and quality control checks.
- Develop troubleshooting and problem-solving skills under supervision.
- Report quality control failures or loss of performance of laboratory instruments or methods for remedial action.

**Laboratory Informatics**

- Make use of Laboratory Information Management Systems (where available) for data management in accordance with authorised protocols.

**Health & Safety Responsibilities**

- Take care of own safety and that of other colleagues and clients as appropriate.
- Work in compliance with all GHS health and safety requirements and attend relevant training to update knowledge in line with GHS Health and Safety policy.
- Follow SOPS and guidelines at all times for the safe handling, processing, packaging, storage, preservation and transportation of pathological specimens.
- Adhere to safe working practices at all times within Containment facilities.
- Take appropriate action and report any laboratory accident or spillage of hazardous substances in accordance with standard protocols.

**Quality Assurance**

- Comply with all GHS Quality Assurance Policy guidelines and work within the prescribed quality standards for the laboratory service.
- Comply with all controls on disinfections and keep relevant records as appropriate.
- Assist in data collection for quality control audits on the operations of the laboratory unit.
General

- Participate in Continuing Professional Development to meet own professional requirements including participation in activities of the Professional Association.
- Comply with all local and national standards of work practice.

Further Information

- The post holder must at all times:
  
  o Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
  o Strictly adhere to the provisions of the Patient’s Charter.
  o Participate in National Health Programmes where indicated.

3.1.4 Principal Biomedical Scientist

Job Title : Biomedical Scientist

Grade : Principal Biomedical Scientist

Responsible To : Head of Unit

Accountable To : Head of Department/Head of Facility

Job Purpose
To provide routine and special medical laboratory (analytical) services and contribute to patient care through good laboratory practice and adherence to quality assurance measures.

Job Summary

- Carry out routine and special laboratory tests in clinical and Reference laboratories and provide cover in the diagnostic laboratory areas where necessary.
- Supervise and undertake technical work of the laboratory including that carried out in high-risk suite within acceptable turnaround times in accordance with departmental standard operating procedures and safety guidelines.
- Document and keep accurate records (log) to maintain good laboratory practice and procedures e.g. SOPs and policies in an acceptable form at all times for quality assurance.
- Provide a high standard of technical service as a member of the health care team to assist in efficient delivery of patient care
- Ensure equipment in their care is maintained to the standards required by the department and by relevant legislation.
- Contribute to the implementation of molecular techniques into the laboratory where appropriate.
- Implement external and internal Quality Control (QC) measures of technical procedures.
- Contribute to research, evaluation of new techniques and laboratory audits.
- Contribute to the allocation and preparation of Rota to meet workload requirements of the laboratory as and when required
- Perform any other duties and responsibilities as may be assigned by head of the Unit.

Diagnostic/Technical Duties (Laboratory areas)

The post holder is required to:

- Undertake the resolution of technical laboratory problems and manage situations which may otherwise result in a service delivery failure.
- Perform and supervise laboratory investigations.
- Ensure that reagents are prepared stored and used in a manner suitable for patient investigations.
- Measure and monitor the accuracy and precision of laboratory investigations using appropriate quality control procedures.
- Perform manual, semi-automated and fully automated laboratory investigations accurately and safely.
• Prepare, examine and report on microscopic, cytology, haematology or other examination of specimens as appropriate.
• Select and undertake tests or procedures as are necessary to identify pathogenic microbes in specimens.
• Perform manual serology/immunology assays as requested.
• Undertake regular, routine maintenance and quality control checks.
• Develop technical knowledge and undertake troubleshooting on hardware and software where necessary in problem-solving where indicated with or without supervision.
• Manage quality control failures or loss of performance of laboratory instruments or methods and make referral where indicated.

Laboratory Informatics

• Make use of Laboratory Information Management Systems (where available) in data management in accordance with authorised protocols.

Management of Financial and Physical Resources

• Assist the Head of Unit in the preparation of purchase orders for reagents, consumables and capital equipment where appropriate.

Management of Human Resources

• Assist in the induction of new staff, interns and students in the laboratory.

3.1.5 Deputy Chief Biomedical Scientist

**Job Title** : Biomedical Scientist

**Grade** : Deputy Chief Biomedical Scientist

**Responsible To** : Divisional Director/ Head of Facility

**Accountable To** : Head of Facility

**Job Purpose**

To provide technical laboratory service, advise, and contribute to quality control through the development, implementation, monitoring of standards and evaluation of services.

**Main Duties and Responsibilities**

As part of the departmental management team the post holder will:

- Oversee the day to day delivery of efficient laboratory services in the facility.
- Contribute to the management of research, service planning and development activities for continuing improvement of laboratory diagnostic services.
- Oversee error logging, turnaround times and the management of internal and external quality control measures in the facility.
- Assist in managing laboratory staff within the facility including performance reviews where delegated.
- Undertake the supervision of laboratory tests within the facility to ensure efficient delivery of such services.
- Contribute to effective liaison with the clinical care division to ensure the smooth running of clinical technical service delivery.
- Assist in the audit of clinical technical services and other quality assurance activities in the facility.
- Participate in internal and external quality control activities as required.
- Supervise and ensure the provision of accurate laboratory reports within acceptable turnaround times.
- Undertake other duties and responsibilities as may be directed by the head of facility.

**Diagnostic/Technical Duties (Laboratory areas)**

The post holder is required to:

- Undertake the resolution of technical laboratory problems and manage situations, which may otherwise result in a service delivery failure.
- Perform and supervise laboratory investigations.
- Monitor and ensure appropriate quality control measures are being adhered to at all times.
- Undertake technical validation and reproducibility checks of laboratory instrumental analyses to ensure accuracy and precision as specified by laboratory protocols.
- Ensure a strict adherence to preventive maintenance schedules on all laboratory instruments at all times.
- Manage quality control failures or loss of performance of laboratory instruments or methods and make referral where indicated.
Interpret laboratory results and take appropriate actions including:
  o Authentication of results
  o Ordering relevant follow-up laboratory procedures
  o Advise the clinical care team where necessary (or infection control unit where appropriate) on the results of laboratory tests which impact on patient care.

**Laboratory Informatics**

- Make use of Laboratory Information Management System (where available) in accordance with authorised protocols.
- Ensure the maintenance of accurate laboratory databases.

**Management of Financial and Physical Resources**

- Assist in the preparation of purchase orders for laboratory reagents, capital equipment and other day to day running costs as and when required.
- Assist in the preparation of costing for commercial trials and contracts where necessary.

**Management of Human Resources**

- Ensure management of staff and students in the laboratory.
- Play an active role in the management of complaints, grievances and disciplinary procedures in the unit as required.
- Contribute to the induction of new laboratory staff and students in the laboratory.
- Organise staff in-service training (CPE) and contribute to the training and assessment of medical laboratory assistants, trainee technicians and technologists.
- Participate in staff appraisal and performance reviews where delegated.
- Manage staff job allocation Rota and annual leave schedules under existing GHS guidelines.
- Organise regular staff meetings as appropriate and maintain an effective line of communication with and between staff.

**General Management Duties**

- Assist the Chief Technologist in the day-to-day management of the laboratory.
- Manage staff and delegate as appropriate to ensure that work of the laboratory is carried out in accordance with departmental standard operating procedures and safety guidelines.
- Resolve technical laboratory problems and manage situations, which may otherwise result in a service delivery failure.
- Prepare regular and timely reports on laboratory performance with regards to standard operating procedures and policies.
- Ensure that capital equipment is maintained to the required standards.
- Manage the implementation of external and internal Quality Control (QC) measures for of all technical laboratory procedures.
- Prepare and supervise staff Rota within the laboratory.
- Contribute to the formulation of departmental operational policies and in their implementation.
• Contribute to the development of standards of Customer Care and external contracts in relation to the laboratory services in the unit.

**Health & Safety Responsibilities**

• Take care of own safety and others who may be affected by actions or omissions.
• Work in compliance with all GHS health and safety requirements and attend relevant training to update knowledge in line with the Hospital’s responsibility to comply with the GHS Health and Safety policy.
• Ensure the safe handling, processing, packaging, storage, preservation and transportation of pathological specimen applying SOPS and guidelines.
• Ensure safe working practices at all times among staff within Containment facilities.
• Take appropriate action if there is a laboratory accident or spillage of hazardous substances in accordance with standard protocols.

**Quality Assurance**

• Comply with all GHS Quality Assurance Policy guidelines and work within the prescribed quality standards for the laboratory service.
• Comply with all controls on disinfections and ensure that GHS guidelines are followed, recorded and monitored as appropriate.
• Carry out regular quality control audits on the operations of the laboratory unit.

**General**

• Participate in Continuing Professional Development to meet own professional requirements including participation in activities of the Professional Association.
• Contribute to compliance with all local and national standards of work practice.

**Further Information**

• The post holder must at all times:
  - Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedures.
  - Strictly adhere to the provisions of the Patient’s Charter.

• *This job description is intended as a guide to the principal duties and responsibilities for the post and should not be considered an exhaustive list. It is subject to change in line with future development of the service*

3.1.6 Chief Biomedical Scientist

Job Title : Biomedical Scientist
Grade : Chief Biomedical Scientist
Responsible To : Divisional Director/ Head of Facility
Accountable To : Head of Facility

Job Purpose

To provide technical laboratory service, advise, and contribute to quality control through the development, implementation, monitoring of standards and evaluation of services.

Main Duties and Responsibilities

As a lead of the departmental management team the post holder will:

- Oversee the day-to-day delivery of efficient laboratory services in the facility.
- Contribute to the management of research, service planning and development activities for continuing improvement of laboratory diagnostic services.
- Play a lead role in managing laboratory staff within the facility including performance reviews.
- Undertake the supervision of routine and specialist clinical laboratory tests within the facility to ensure efficient delivery of such services.
- Contribute to effective liaison with the clinical care division to ensure the smooth running of clinical technical service delivery.
- Play a lead role in the audit of clinical technical services and other quality assurance activities in the facility.
- Participate in external quality control activities as required.
- Supervise and ensure the provision of accurate laboratory reports within acceptable turnaround times.
- Undertake other duties and responsibilities as may be directed by the head of facility.

Diagnostic/Technical Duties (Laboratory areas)

The post holder is required to:

- Lead in the resolution of technical laboratory problems and manage situations, which may otherwise result in a service delivery failure.
- Perform and supervise manual, semi-automated and fully automated laboratory investigations.
- Monitor the accuracy and precision of laboratory investigations and ensure appropriate quality control measures are being adhered to at all times.
- Undertake technical validation and reproducibility checks of laboratory instrumental analyses to ensure accuracy and precision as specified by laboratory protocols.
- Ensure that preventive maintenance schedules have been carried out on laboratory instruments prior to them being used for patient investigations.
- Manage corrective action when quality control procedures indicate loss of performance with laboratory instruments or methods.
- Advise the clinical care team where necessary on the results of laboratory
tests which impact on patient care.

- Interpret laboratory results and take appropriate actions including:
  - Authentication of results
  - Ordering relevant follow-up laboratory procedures
  - Informing departmental medical staff (or infection control unit where appropriate) of laboratory test results which impact on patient care.

**Laboratory Informatics**

- Make use of Laboratory Information Management System (where available) in accordance with authorised protocols.
- Ensure the maintenance of accurate laboratory databases.

**Management of Financial and Physical Resources**

- Contribute to the preparation of realistic costing and purchase orders for laboratory reagents, capital equipment and other day-to-day running costs.
- Assist in the preparation of costing for commercial trials and contracts where necessary.
- Ensure that capital equipment is maintained to the required standards.

**Management of Human Resources**

- Line management of staff in the laboratory.
- Play an active role in the management of complaints, grievances and disciplinary procedures in the unit as required.
- Contribute to the staff recruitment process including the induction of new staff.
- Organise staff in-service training (CPE) and contribute to the training and assessment of medical laboratory assistants, trainee technicians and technologists.
- Participate in staff appraisal and performance reviews.
- Manage staff job allocation Rota and annual leave schedules under existing GHS guidelines.
- Organise regular staff meetings as appropriate and maintain an effective line of communication with and between staff.

**General Management Duties**

- Ensure day-to-day management of the laboratory.
- Manage staff and delegate as appropriate to ensure that the technical work of the laboratory including the high-risk suite are carried out in accordance with departmental standard operating procedures and safety guidelines.
- Resolve technical laboratory problems and manage situations, which may otherwise result in a service delivery failure.
- Prepare regular and timely reports on laboratory performance with regards to standard operating procedures and policies.
- Manage the implementation of external and internal Quality Control (QC) measures for all technical procedures.
- Lead in the formulation of departmental operational policies and co-ordinate their implementation.
- Manage laboratory tours for visiting parties (GHS (MOH) or outside agencies.
• Lead in the development of standards of Customer Care and external contracts in relation to the laboratory services in the unit.

**Health & Safety Responsibilities**

• Take care of own safety and others who may be affected by actions or omissions.
• Work in compliance with all GHS health and safety requirements and keep up to date on developments and training and other requirements in line with GHS Health and Safety policy.
• Coordinate and ensure safe working practices including the safe handling, processing, packaging, storage, preservation and transportation of pathological specimen both within the department and their transport to other establishments following SOPS and guidelines.

**Quality Assurance**

• Comply with all GHS Quality Assurance Policy guidelines and work within the prescribed quality standards for the laboratory service.
• Ensure that all GHS controls and guidelines on disinfections are followed, recorded and monitored as appropriate.
• Coordinate and ensure regular quality control audits on operations of the laboratory.

**General**

• Participate in Continuing Professional Development to meet professional requirements including participation in activities of the Professional Association.
• Ensure compliance with all local and national standards of work practice.

**Further Information**

• The post holder must at all times:
  o Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
  o Strictly adhere to the provisions of the Patient’s Charter.

• *This job description is intended as a guide to the principal duties and responsibilities for the post and should not be considered an exhaustive list. It is subject to change in line with future developments of the service*

3.2 MEDICAL LABORATORY TECHNICIAN

3.2.1 Medical Laboratory Technician

Job Title : Medical Laboratory Technician

Grade : Medical Laboratory Technician

Responsible To : Head of Unit

Accountable To : Head of Facility/Department

Job Purpose

To undertake and assist in the efficient processing, analysis, interpretation and reporting of results of laboratory tests on specimens received in the Laboratory department to support clinical technical services in the provision of good patient care.

Main Duties and Responsibilities

General

- Perform tests and procedures as laid down in Standard Operating Procedures (SOPs) and train others on the job.
- Undertake analytical tasks within tight turnaround times and assist junior laboratory staff working under their supervision.
- Accurately and safely use and carry out routine maintenance and performance checks on equipment with minimal supervision and report faults to Unit Supervisor.
- Follow prescribed procedures and exercise a personal duty of care in maintaining laboratory equipment and facilities in good order.
- Use laboratory computer system to:
  - Input requests and match patient records as appropriate.
  - Input results and generate printed reports.
  - Generate worksheet (lists)
- Carry out appropriate tests to confirm the identity of micro-organisms;
- Carry out appropriate antimicrobial sensitivity tests;
- Demonstrate an ability to use a range of automated equipment and manual techniques.
- Carry out assays using appropriate analyzers and understand the significance and implications of the results obtained.
- Carry out appropriate quality checks as required and complete quality record sheets as required.
- Undertake any other duties or responsibilities as may be directed by the head of facility.

Laboratory Informatics

- Make use of Laboratory Information Management Systems (where available) for data management in accordance with authorized protocols.

Communication and Working Relationship

- Maintain effective communication with colleagues and other professional groups and clients.
• Demonstrate ability to work effectively in a multidisciplinary team of health workers in the facility.
• Work with Laboratory Attendants and other Laboratory Assistants in a collegiate manner.
• Attend and contribute at staff meetings.
• Keep log of own performance and in-service training log for purposes of appraisal.

Person and People Development

• Attend in-house training sessions relating to health and safety and other aspects of professional development
• Participate in internal audits of laboratory performance as requested by senior staff.
• Keep up to date on job related issues as appropriate.
• Keep log of own performance and in-service training log for purposes of appraisal.

Health & Safety Responsibilities

• Take care of own safety and that of other colleagues and clients as appropriate.
• Work in compliance with all GHS health and safety requirements and attend relevant training to update knowledge in line with GHS Health and Safety policy.
• Follow SOPS and guidelines at all times for the safe handling, processing, packaging, storage, preservation and transportation of pathological specimens.
• Adhere to safe working practices at all times within Containment facilities.
• Report any laboratory accident or spillage of hazardous substances to Superior Officers in accordance with standard protocols.

Quality assurance

• Comply with all GHS Quality Assurance Policy guidelines and work within the prescribed quality standards for the laboratory service.
• Comply with all controls on disinfections and keep relevant records as appropriate.
• Assist in data collection for quality control audits on the operations of the laboratory unit.
• Participate in quality monitoring schemes such as:
  o Measuring temperature of refrigerators, freezers and incubators.
  o Using and recording performance of controls in tests and assays.
  o Recording batch numbers of kits.
  o Completing information on worksheets so that audit trails for specimen examination and test performance can be achieved.

Further Information

• The post holder must at all times:
  o Work in accordance with GHS Code of Professional Conduct and Disciplinary Procedure.
  o Strictly adhere to the provisions of the Patient’s Charter.
  o Participate in National Health Programmes as directed.

• This job description is intended as a guide to the principal duties and responsibilities for the post and should not be considered an exhaustive list. It is subject to change in line with future development of the service

3.2.4 Assistant Chief Medical Laboratory Technician

Job Title: Medical Laboratory Technician
Grade: Assistant Chief Medical Laboratory Technician
Responsible To: Head of Unit
Accountable To: Head of Facility/Department

Job Purpose
To undertake and supervise the efficient processing, analysis, interpretation and reporting of results of laboratory tests on specimens received in the Laboratory department to support clinical technical services in the provision of good patient care.

Main Duties and Responsibilities

General
- Perform tests and procedures as laid down in Standard Operating Procedures (SOPs) and train others on the job.
- Undertake analytical tasks and supervise laboratory technicians and assistants (junior laboratory staff) working under their supervision.
- Ensure that all work is completed to a reliable, accurate and reproducible standard and within tight turnaround times.
- Work in conjunction with Medical Laboratory Technologists to investigate, evaluate and implement new techniques, technologies and procedures.
- Assist in departmental stock control schemes:
  - Ensure adequate stocks of chemicals, reagents and consumables.
  - Keep stock records as required.
- Accurately and safely use and carry out routine maintenance and performance checks on equipment and report faults to Unit Supervisor.
- Follow prescribed procedures to exercise a personal duty of care maintaining laboratory equipment and facilities in good order.
- Use laboratory computer system to:
  - Input requests and match patient records as appropriate.
  - Input results and generate printed reports.
  - Generate worksheet (lists)
- With the assistance of a Medical Laboratory Technologist (Biomedical Scientist),
  - Use a range of automated equipment and manual techniques to detect antibodies or antigens from blood samples and clinical specimens.
  - Carry out assays using analyzers, to detect the levels of antibiotics in the blood of patients and to understand the significance and implications of the results obtained.
- Undertake any other duties or responsibilities as may be assigned by the head of facility.

Section Work
The jobholder should be able to:
- Ensure the efficient processing of specimens using SOPs together with specialist knowledge concerning various pathological specimens;
- Carry out appropriate tests to confirm the identity of micro-organisms;
105

- Carry out appropriate antimicrobial sensitivity tests;
- Check and authorize all results for entry onto the Laboratory computer system for subsequent reporting.

**Laboratory Informatics**

- Make use of Laboratory Information Management Systems (where available) for data management in accordance with authorized protocols.

**Communication and Working Relationship**

- Maintain effective communication with colleagues and other professional groups and clients to foster good team working relationships.
- Demonstrate ability to work effectively in a multidisciplinary team of health workers in the facility.
- Work with and direct Laboratory Attendants and other Laboratory Assistants in a fair and impartial manner.
- Attend and contribute at staff meetings.

**Person and People Development**

- Assist in the training and supervision of Trainee Technicians, Medical laboratory Assistants (MLA), Laboratory Attendant, intern Biomedical Scientists and students in the department.
- Attend in-house training sessions relating to health and safety and professional development.
- Participate in external quality assurance programmes and any internal audits of laboratory performance as requested by senior staff.
- Keep up to date on job related issues as appropriate.
- Participate in staff appraisal and personal development within the Laboratory Unit.
- Monitor own performance against agreed objectives
- Keep log of own performance and in-service training log for purposes of appraisal.

**Health & Safety Responsibilities**

- Take care of own safety and that of other colleagues and clients as appropriate.
- Work in compliance with all GHS health and safety requirements and attend relevant training to update knowledge in line with GHS Health and Safety policy.
- Ensure that staff under their supervision follow SOPS and guidelines at all times for the safe handling, processing, packaging, storage, preservation and transportation of pathological specimens.
- Ensure that staff adhere to safe working practices at all times within Containment facilities.
- Report any laboratory accident or spillage of hazardous substances in accordance with standard protocols.

**Quality Assurance**

- Comply with all GHS Quality Assurance Policy guidelines and work within the prescribed quality standards for the laboratory service.
- Comply with and supervise junior staff on all controls on disinfections and keep relevant records as appropriate.

3.2.5 Chief Medical Laboratory Technician

Job Title : Medical Laboratory Technician
Grade : Chief Medical Laboratory Technician
Responsible To : Head of Unit
Accountable To : Head of Facility/Department

Job Purpose
To undertake and supervise the efficient processing, analysis, interpretation and reporting of results of laboratory tests on specimens received in the Laboratory department to support clinical technical services in the provision of good patient care.

Main Duties and Responsibilities

General

- Act as line manager and supervise laboratory technicians and assistants (junior laboratory staff) by assigning and reviewing their work.
- Perform tests and procedures as laid down in GHS Standard Operating Procedures (SOPs) and train others on the job.
- Ensure that all work is completed to a reliable, accurate and reproducible standard and within tight turnaround times.
- Work in conjunction with Medical Laboratory Technologists to investigate, evaluate and implement new techniques, technologies and procedures.
- Assist in departmental stock control schemes:
  - Ensure adequate stocks of chemicals, reagents and consumables.
  - Keep stock records as required.
- Accurately and safely use and carry out routine maintenance and performance checks on equipment and report faults to Unit Supervisor.
- Follow prescribed procedures for maintaining laboratory equipment and facilities.
- With the assistance of a Medical Laboratory Technologist (Biomedical Scientist),
  - Use a range of automated equipment and manual techniques to detect antibodies or antigens from blood samples and clinical specimens.
  - Carry out assays using analyzers, to detect the levels of antibiotics in the blood of patients and to understand the significance and implications of the results obtained.
- Undertake any other duties or responsibilities as may be assigned by the head of facility.

Section Work
The jobholder should be able to:

- Ensure the efficient processing of specimens using SOPs together with specialist knowledge concerning various pathological specimens;
- Carry out appropriate tests to confirm the identity of micro-organisms;
- Carry out appropriate antimicrobial sensitivity tests;
- Check and authorize all results for entry onto the Laboratory computer system for subsequent reporting.
Laboratory Informatics

- Make use of Laboratory Information Management Systems (where available) for data management in accordance with authorised protocols.

Communication and Working Relationship

- Communicate effectively with colleagues and other professional groups and clients to foster good team working relationships.
- Effectively work in a team with other health workers in the facility.
- Be able to work with and direct Laboratory Attendants and other Laboratory Assistants in a fair and impartial manner.
- Attend and contribute at general staff meetings regarding developments and changes occurring within the GHS.

Person and People Development

- Assist in the training and supervision of Trainee Technicians, Medical laboratory Assistants (MLA), Laboratory Attendant, intern Biomedical Scientists and students in the department.
- Attend in-house training sessions relating to health and safety and professional development.
- Participate in external quality assurance programmes and any internal audits of laboratory performance as requested by senior staff.
- Attend relevant external training sessions and meetings, and keep up to date on job related issues as appropriate.
- Undertake and participate in staff appraisal and personal development within the Laboratory Unit.
- Monitor own performance against agreed objectives.

Health & Safety Responsibilities

- Take care of own safety and that of other colleagues and clients as appropriate.
- Work in compliance with all GHS health and safety requirements and attend relevant training to update knowledge in line with GHS Health and Safety policy.
- Ensure that staffs under their supervision follow SOPS and guidelines at all times for the safe handling, processing, packaging, storage, preservation and transportation of pathological specimens.
- Ensure that staffs adhere to safe working practices at all times within Containment facilities.
- Take appropriate action as line manager and report any laboratory accident or spillage of hazardous substances in accordance with standard protocols.

Quality Assurance

- Ensure that staff under their supervision comply with all GHS Quality Assurance Policy guidelines and work within the prescribed quality standards for the laboratory service.
- Ensure that staffs under their supervision comply with all controls on disinfections and keep relevant records as appropriate.
- Contribute to data collection for quality control audits on the operations of the laboratory unit.
- Take part in quality monitoring schemes such as:
  o Measuring temperature of refrigerators, freezers and incubators.
o Using and recording performance of controls in tests and assays.
o Recording batch numbers of kits.
o Completing information on worksheets so that audit trails for specimen examination and test performance can be achieved.

Further Information

- The post holder must at all times:
  o Work in accordance with GHS Code of Professional Conduct and Disciplinary Procedure.
o Strictly adhere to the provisions of the Patient’s Charter.
o Participate in National Health Programmes

3.5 PROSECTORS

3.5.1 Prosector

Job Title : Prosector
Grade : Prosector
Responsible To : Unit-In-Charge
Accountable To : Head of Department

Job Purpose

To assist the Unit in charge in the provision of an efficient and high quality autopsy Service in the facility

General

- Assist in the arrangement of autopsies through liaison with the Unit In Charge and the Consultant Histopathologists.
- Help maintain proper orderliness of the mortuary. Undertake cleaning of instruments after autopsy. Undertake cleaning and disinfec-tions of the autopsy room, body stores and general areas.
- Collect soiled linen and clothing for cleaning.
- Help maintain proper mortuary records (eg. mortuary registers, workload, and fridge temperatures).

Main Duties and Responsibilities

- Prepare dead bodies for routine autopsies after discussion with the Consultant Histopathologist and following scrutiny of the appropriate forms/documents.
- Assist the Consultant Histopathologists with the collection of samples of tissue for histological examination following autopsy.
- Assist the Consultant Histopathologists with the removal of organs for transplant and other specialised purposes.
- Assist the Consultant Histopathologists in taking, recording, packaging and transporting specimens for further tests (eg. toxicology) or storage in the department and their eventual recorded disposal if appropriate.
- Carry out photography of specimens and cadavers as directed by the Consultant Histopathologist or Coroner and organise X-rays to be taken as required.
- Arrange for the correct fixation and storage of autopsy specimens for future investigations.
- Be responsible for the appropriate cleansing, reconstruction and care of cadavers after autopsy.
- Organize the recording of all drugs removed from the deceased in liaison with the Coroner’s Office and their recorded disposal if/when authorised.
- Arrange the transfer and collection of corpses or fetuses to/from any Hospital together with appropriate paperwork and record keeping.
- In liaison with the Unit In Charge and the Hospital Chaplain, arrange for appropriate disposal of corpses or fetuses as requested by next of kin.
• Be responsible for the reception of bodies into the mortuary, check identity, clean and store appropriately and hand over to authorised persons including the recording, safekeeping and return of valuables removed from the deceased.
• In the absence of the Coroner’s Officer, carry out responsibility on his behalf for identifications and liaison with the families of the deceased.
• Liaise with the Coroner’s Officers to ensure that a copy of the ‘next of kin’ statement is available in all cases.
• Liaise with hospital staff, police, undertakers and relations of the deceased where necessary. These duties will include reception of relatives who wish to view the body of the deceased and also medical staff to ensure compliance with cremation procedures.
• Assist in autopsies at the request of Pathologists.
  o Dissect corpses for pathological examination
  o Stuff the bodies
  o Sew up the bodies
• Assist at autopsy when the Consultant Histopathologist is teaching and examining.
• Perform any other official duty that may be assigned

Communication and Working Relationships

• Maintain effective communication with colleagues.
• Attend and contribute at general staff meetings

Personal and People Development

• Attend in-house training session relating to autopsy services to update knowledge and skills
• Monitor own performance against agreed objectives
• Assist in the training of Porters (Mortuary men) who are required to undertake mortuary duties (ie. receiving/delivering and recording bodies into the mortuary).
• Keep log of own performance and in-service training log for purposes of appraisal

Health and Safety Responsibilities

• Take care of own safety and others who may be affected by your actions or omissions
• Adhere to the GHS Health and Safety Policies and use any equipment or personal protective equipment provided to ensure safety.
• Report any accident/incident or ill health, failings in premises, equipment or personal protective equipment to the Unit In-Charge
• Assist the Unit in-Charge to maintain a safe, clean, and pleasant working environment.

Quality Assurance

• Work within the prescribed quality standards as set by the Unit-In-Charge/ Head of Department
• Comply with the GHS quality assurance policy and guidelines.

Further Information

• The post holder must at all times:
  o Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
o Strictly adhere to the provisions of the Patient’s Charter.

- This job description is intended as a guide to the principal duties and responsibilities for the post and should not be considered an exhaustive list. It is subject to change in line with future development of the service

4.0 ENTOMOLOGISTS

4.1 Entomologist

**Job Title**: Entomologist

**Grade**: Entomologist

**Responsible To**: Head of Unit/Department

**Accountable To**: Head of Facility

**Job Purpose**

To provide technical advice and services as well as administrative support to the Public Health Division (Disease Control Unit) in the control of vectors and vector borne diseases

**Main Duties and Responsibilities**

- Participate in the surveillance on vector borne diseases to prevent outbreaks and reduce incidence/prevalence of such diseases. This includes:
  - Assessing yellow fever vector indices on monthly basis (i.e container index, house index, breteau index, biting rate etc)
  - Assessing entomological inoculation rate of the malaria vector
  - Identifying and mapping up breeding sites of mosquitoes
  - Identifying sunfly vectors of leishmaniasis
  - Undertaking surveillance on guinea worm, African trypanosomiasis vectors, schistosomiasis snails, lymphatic filariasis vectors, onchocerciasis and mapping up breeding sites
- Collect data on vectors of malaria, yellow fever and others on monthly basis
- Participate in the analysis of data collected on vectors and vector-borne diseases
- Assist in dissecting mosquitoes to establish infectivity rate of lymphatic vector as well as sponzoites and parous rates
- Assist in dissecting blackflies and other flies to establish infectivity rate of onchocerciasis
- Assist in ensuring quality of insecticides for net treatment and quality of the treated net
- Participate in the monitoring and evaluation of insecticides resistance to mosquito vectors of malaria
- Assist in ensuring maintenance of laboratory equipment
- Allocate insecticide treated bednets to vulnerable groups
- Perform any other official duty that may be assigned

**Communication and Working Relationships**

- Maintain effective communication with colleagues, clients/patients and other staff to foster good team working relationships
- Participate in professional meetings and conferences as required.
- Attend and contribute at general staff meetings

**Personal and People Development**

- Develop and maintain continuing personal and professional development to meet the changing demands in the area of control of vectors and vector borne diseases
- Monitor own performance against agreed objectives and standards.
• Participate in the training for new entrants as well as for other health workers on vector/pest control, general entomology and net treatment
• Keep up to date on job related issues as appropriate.
• Keep log of own performance and in-service training log for purposes of appraisal.

Research

• Participate in research on vectors in collaboration with research institution
• Apply relevant evidence-based research findings

Health and Safety Responsibilities

• Take care of own safety and others who may be affected by your actions or omissions
• Comply with existing Health and Safety Policies and Procedures of GHS
• Report any accident, damage to equipment/tools or ill health, failings in premises, or personal protective equipment to the In-Charge

Quality Assurance

• Comply with the GHS quality assurance policy and guidelines.
• Keep up-to-date with quality developments relevant to area of work and related services

Further Information

• The post holder must at all times:
  o Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
  o Strictly adhere to the provisions of the Patient’s Charter.
• This job description is intended as a guide to the principal duties and responsibilities for the post and should not be considered an exhaustive list. It is subject to change in line with future development of the service

4.3 Principal Entomologist

Job Title : Entomologist

Grade : Principal Entomologist

Responsible To : Head of Unit/ Department

Accountable To : Head of Facility

Job Purpose

To provide technical advice and services as well as administrative support to the Public Health Division (Disease Control Unit) in the control of vectors and vector borne diseases

Main Duties and Responsibilities

- Undertake surveillance on vector borne diseases to prevent outbreaks and reduce incidence/prevalence of such diseases
  - Assess the yellow fever vector indices on monthly basis (i.e container index, house index, breteau index, biting rate etc)
  - Assess entomological inoculation rate of the malaria vector
  - Identify and map up breeding sites of mosquitoes
  - Identify sunfly vectors of leishmaniasis
  - Undertake surveillance on guinea worm, African trypanosomiasis vectors, schistosomiasis snails, lymphatic filariasis vectors, onchocerciasis and map up breeding sites
- Plan and supervise control of vectors of vector borne diseases
- Collect and analyze data on vectors of malaria, yellow fever and others on monthly basis
- Dissect mosquitoes to establish sporozoites rate, parous rate and infectivity rate of lymphatic vector
- Dissect blackflies and other flies to establish infectivity rate of onchocerciasis
- Ensure quality of insecticides for net treatment and quality of the treated net
- Ensure allocation of insecticide treated bednets to vulnerable groups
- Advise on technical application of insecticide
- Conduct regular monitoring and evaluation on insecticides resistance to mosquito vectors of malaria
- Supervise the determination of mosquito susceptibility to insecticides
- Ensure maintenance of laboratory equipment
- Perform any other official duty that may be assigned

Communication and Working Relationships

- Maintain effective communication with colleagues, clients/patients and other staff to foster good team working relationships
- Develop working partnership networks with individuals, groups, communities and agencies in the districts.
- Participate in professional meetings and conferences as required.
- Attend and contribute at general staff meetings
Personal and People Development

- Develop and maintain continuing personal and professional development to meet the changing demands in the area of control of vectors and vector borne diseases
- Monitor own performance against agreed objectives and standards.
- Conduct training for new entrants as well as for other health workers on vector/pest control, general entomology and net treatment
- Keep up to date on job related issues as appropriate.
- Keep log of own performance and in-service training log for purposes of appraisal.

Management

- Participate in the day-to-day management of the unit including personnel matters and appropriate record keeping
- Participate in roster planning and monitoring in the unit
- Contribute to the preparation of budget for activities of the unit
- Contribute to the preparation of annual report on the activities of the unit
- Contribute to devising of improved job methods for increasing efficiency.
- Promote a positive image for GHS.

Research

- Undertake research on vectors in collaboration with research institution

Health and Safety Responsibilities

- Take care of own safety and others who may be affected by your actions or omissions
- Comply with existing Health and Safety Policies and Procedures of GHS
- Report any accident, damage to equipment/tools or ill health, failings in premises, or personal protective equipment to the In-Charge

Quality Assurance

- Comply with the GHS quality assurance policy and guidelines.
- Keep up-to-date with quality developments relevant to area of work and related services

Further Information

- The post holder must at all times:
  - Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
  - Strictly adhere to the provisions of the Patient’s Charter.

4.4 Deputy Chief Entomologist

Job Title: Entomologist

Grade: Deputy Chief Principal Entomologist

Responsible To: Head of Unit/Department

Accountable To: Head of Facility

Job Purpose

To provide technical advice and services as well as administrative support to the Director Public Health/Head of Disease Control Unit in the control of vectors and vector borne diseases

Main Duties and Responsibilities

- Provide leadership in the surveillance on vector borne diseases to prevent outbreaks and reduce incidence or prevalence of such diseases. This includes ensuring periodic:
  - Assessment of the yellow fever vector indices on monthly basis (i.e. container index, house index, biting rate etc)
  - Assessment of entomological inoculation rate of the malaria vectors
  - Identification and mapping up of breeding sites of mosquitoes
  - Identification of sunfly vectors of leishmaniasis
  - Surveillance on guinea worm, African trypanosomiasis vectors, schistosomiasis snails, lymphatic filariasis vectors, onchocerciasis and map up breeding sites

- Plan and Supervise control of vectors of vector borne diseases

- Ensure maintenance of laboratory equipment like dissecting microscope etc

- Supervise and monitor the allocation of insecticide treated bednets to vulnerable groups

- Provide technical support for national health programme relating to area of work.

- Lead in the collection and analysis of data on vectors of malaria, yellow fever and others on monthly basis

- Supervise the establishment of laboratory for vector studies

- Provide leadership in the identification of vector species

- Supervise the dissecting of mosquitoes to establish filarial rate as well as sporozoit and parous rates

- Supervise the dissecting of blackflies and other flies/vectors to establish infectivity rates

- Ensure quality of insecticides for net treatment and quality of the treated net

- Advise on technical application of insecticide

- Conduct regular monitoring and evaluation on insecticides resistance to mosquito vectors of malaria

- Supervise the determination of mosquito susceptibility to insecticides.

- Undertake regular supervisory visits to the regions

Communication and Working Relationships

- Maintain effective communication with colleagues, clients/patients and other staff to foster good team working relationships

- Develop working partnership networks with individuals, groups, communities and agencies in the districts.

- Participate in professional meetings and conferences as required.

- Attend and contribute at general staff meetings
Personal and People Development

- Develop and maintain continuing personal and professional development to meet the changing demands in the area of control of vectors and vector borne diseases
- Monitor own performance against agreed objectives and standards.
- Conduct training for new entrants as well as for other health workers on vector/pest control, general entomology and net treatment
- Keep up to date on job related issues as appropriate.
- Ensure continuing professional development of the Entomologists
- Conduct staff performance appraisal in the unit
- Keep log of own performance and in-service training log for purposes of appraisal.

Management

- Provide daily operational management role in the unit
- Ensure efficient management of supplies and logistics to the unit
- Ensure roster planning and monitoring and documentation of all leave for staff in the unit
- Ensure effective and efficient use of human and material resource in the unit
- Promote positive image of the unit
- Ensure maintenance of good standards of records of all activities undertaken in the unit
- Supervise the preparation of monthly, quarterly, and annual reports on the activities of the unit
- Devise improved job methods for increasing efficiency.

Research

- Conduct/participate in operational research as well as research on vectors in collaboration with research institution
- Apply relevant evidence-based research findings

Health and Safety Responsibilities

- Take care of own safety and others who may be affected by your actions or omissions
- Ensure and comply with existing health and safety policies and procedures of the GHS/MOH.
- Ensure the safety of the workplace.

Quality Assurance

- Adhere to the GHS quality assurance policy and guidelines.
- Ensure that complaints from patients, visitors or staff are resolved where possible and reported to the In-Charge
- Act as a role model in quality improvement.
- Keep up-to-date with quality developments relevant to area of work and related services.

Further Information

- The post holder must at all times:
  - Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
  - Strictly adhere to the provisions of the Patient’s Charter.

5.0 X-RAY STAFF

5.1 RADIOGRAPHERS

5.1.1 Radiographer

Job Title : Radiographer
Grade : Radiographer
Responsible To : Unit-In-Charge
Accountable To : Head of Department

Job Purpose

To provide both diagnostic and therapeutics radiographic services

Main Duties and Responsibilities

- Undertake a range of radiological services as requested by Physicians.
- Assist in the evaluation of clinical history and examination request
- Prepare and process radiological materials for procedures and reporting
- Assist in the evaluation of radiograph/sonograms for technical qualities
- Initiate measures to ensure patient safety during procedures and treatment.
- Initiate life support procedures for patients if necessary
- Assist in the planning of in-vitro and in-vivo diagnostic and therapeutic procedures
- Perform radiological diagnostic procedures commensurate with the level of expertise
- Participate in theatre radiography procedures.
- Assist in the maintenance of proper records of radiation of all staff and advise accordingly.
- Perform any other official duty that may be assigned.

Communication and Working Relationships

- Maintain effective communication with colleagues, clients/patients and other staff to foster good team working relationships
- Participate in professional meetings and conferences as required.
- Attend and contribute at general staff meetings

Personal and People Development

- Develop and maintain continuing personal and professional development to meet the changing demands in the area of radiographic services
- Monitor own performance against agreed objectives and standards.
- Keep up to date on job related issues as appropriate.
- Participate in developing and conducting continuing education programs for the Radiographers, Technical Officers and Assistants in the Unit/Department.
- Participate in the orientation of new Radiographers and Technical Staff of the Unit/department.
- Keep log of own performance and in-service training log for purposes of appraisal.
Management

- Participate in the day-to-day management of radiology unit and work flexibly and diligently in any section of the radiology unit as required.
- Assist in ensuring regular availability of supplies and other logistics in the radiology unit/department.
- Participate in roster planning and monitoring in the unit
- Assist in maintaining up-to-date records in the unit
- Assist in ensuring effective and efficient use of human and material resources in the unit/department.
- Participate in the preparations of periodic reports, plans and budgets for the unit/department.

Research

- Participate in research and utilization of the research results.

Health and Safety Responsibilities

- Take care of own safety and others who may be affected by your actions or omissions
- Apply principles of radiation protection to minimize exposure to patients, self and others.
- Comply with and ensure adherence to the health and safety policies, guidelines/protocols in the facility (eg. the use of personal protective clothing/equipment).
- Liaise with the facility management and ensure that any advice on health and safety is implemented
- Ensure that accidents/incidents or ill health, failings in equipment are reported and recorded.
- Assist in ensuring planned preventive maintenance of plant and equipment in the department.

Quality Assurance

- Operate in accordance with radiological quality systems work instructions (ensure good photographic quality)
- Comply with the GHS quality assurance policy and guidelines.
- Assist in the development of and participate in departmental and interdisciplinary quality improvement programs
- Keep up-to-date with quality developments relevant to area of work and related services

Further Information

- The post holder must at all times:
  - Work in accordance with the GHS Code of Professional Conduct and Disciplinary Procedure.
  - Strictly adhere to the provisions of the Patient’s Charter.
